Publishing Company

Dear ELI S.r.l. Publishing,

This letter is to acknowledge that The Alliance for International Reforestation, Inc. (AIR), has received payment from Raz Godelnik of Eco-Libris in order to plant 6,500 trees on your behalf, in Guatemala!

AIR has been in collaboration with Eco-Libris for almost three years now, and Raz Godelnik faithfully sends payments to AIR which we use directly in the tree-planting work. AIR incorporates five-years of farmer training, with the planting of trees, which is why these trees are not simply cut down, but remain on the mountain slopes indefinitely, benefitting the local residents as well as the entire planet. I am enclosing a recent photograph of Don Enrique with an AIR technician, Luis, standing on a mountaintop which they have reforested with pine trees, working together.

We are pleased to be a part of this creative collaboration with Eco-Libris, and your new partnership is especially exciting, enabling AIR to plant even more trees during this summer planting season. Thank you!

For the Earth,

Anne Motley Hallum
Chair of the Board of Directors
The Alliance for International Reforestation, Inc.
